This is not a recommendation or offer of any financial product. **Past performance is not indicative of future results, and investors should consider their own objectives and risk tolerance.** Indices, if presented, do not include fees, are unmanaged, and not available for direct investment. Definitions & Methodology: The S&P 500 tracks the performance of 500 large-cap U.S. companies, serving as a benchmark for the U.S. stock market. The index is weighted by market capitalization. The U.S. Bloomberg Aggregate Bond Index measures the performance of the U.S. investment-grade bond market, including government, corporate, and mortgage-backed securities, reflecting overall bond market performance. The chart shows the average rolling yearly return (since 1990) by allocation of "stocks" (S&P 500) and "bonds" (U.S. Bloomberg Aggregate Bond Index). Returns are total returns. The chart also has the past 1 year of return by stock / bond split shown. The chart illustrates that a higher allocation to stocks historically has meant a higher average yearly return, while a higher allocation to bonds has meant a lower average yearly return.

This is not a recommendation or offer of any financial product. **Past performance is not indicative of future results, and investors should consider their own objectives and risk tolerance.** Indices, if presented, do not include fees, are unmanaged, and not available for direct investment. Definitions & Methodology: The S&P 500 tracks the performance of 500 large-cap U.S. companies, serving as a benchmark for the U.S. stock market. The index is weighted by market capitalization. The chart shows historical bull and bear markets since 1949. Bull Markets are defined as periods when the S&P 500 experiences a price gain of 20% or more following a decline of 20% or more from its previous peak. Bear Markets are defined as periods when the S&P 500 experiences a price loss of 20% or more following a gain of 20% or more from its previous trough. The chart illustrates that historically, bull markets in the S&P 500 tend to be longer in duration than bear markets in the S&P 500.
